# Your **BEST** Partner for Tower Parking

**B**enefit-oriented

**E**conomical and ecological

**S**afe secure operation

**T**rustworthy and dependable

1

## High-rise Type Available

High-rise ELEPARK is available for buildings over 100m high and can store approximately 130 sedans or 100 SUVs.

2

## EV Charging Equipment

To help reduce CO<sub>2</sub> emissions and secure a sustainable future for our planet, EVs and PHEVs are becoming more prevalent. Pallets can be fitted with EV charging power supplies to support battery charging while parked.

3

## Premium Interiors

Aesthetically pleasing premium interiors suitable for condominiums and multi-purpose facilities are available.

4

## Flat-type Pallets for Supercars and Barrier-free

Available flat-type pallets and flat entry floor can meet needs of variety of users. For instance, it is ideal for supercars with low minimum ground clearance, and friendly to elderly or wheelchair users who require a barrier-free design.

5

## Noise and Vibration Reduction Measures

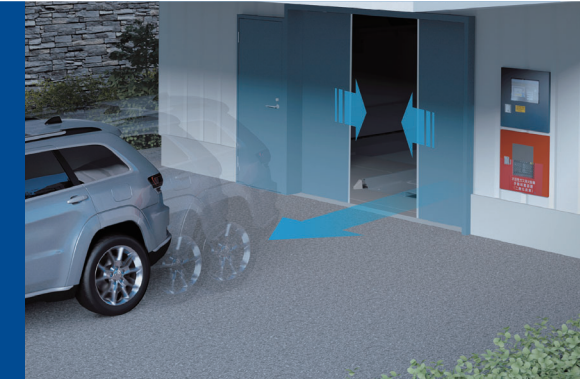

Tailored solutions keep noise and vibration to a minimum to satisfy the specific needs of surrounding environments such as condos, hotels, and hospitals.

6

## Smooth Entry/Exit Systems

ELEPARK options make parking more user-friendly by reducing waiting times. Options include: Random Entry System (eliminating the need for pallet replacement), Group Control System (prepares the quickest empty unit for entry at the approach of a vehicle), Remote Control, Parking Exit Reservation, and Automated Door Closure after exit.

NEED MORE USABILITY & RELIABILITY?
