Horizontal Puzzle Type

■ HIGH SPACE EFFICIENCY

Provide more parking space within the planned area, minimizing the machine depth of parking space and create additional spaces for other purpose of use.

■ HIGH LAYOUT FLEXIBILITY

Individually driven pallets make it possible to adjust the storage spots and lift layouts to fit into irregular & non-square limited architectural spaces, by avoiding columns and walls.

■ HIGH USABILITY

*Wide and flat parking space with Standard flat-pallet is easy to park low ground clearance vehicles and is also user friendly for entry & exit access.
Exit smart route analysis system always chooses the quickest route which provide minimum waiting time.*
