G-Sips

■ HIGH RELIABILITY & SAFETY

Independent operation of each floor CARTs and LIFTs with reliable control systems provide high efficiency with sensors, and pallets secure both vehicle and user safety.

■ EASY TO INTRODUCE

Meet the architectural needs for simply securing a large number of parking spaces similar to the layout of conventional parking at the lower floors or underground.

■ EASY TO CUSTOMIZE

Vehicle dimensions to option ancillary support systems, from practical uses to high luxury office/condo uses, each system is tailored to the specific needs for the customer.
