

## PNEUMATIC TYPE BULK TRANSPORTER **BULK Z**

Bulk transporter is specially designed for transporting a large amount of powder material such as cement and fly-ash in bulk. At the intended destination, it discharges loading material to distant places within a short period of time by air pressure device, through the air compressor powered by truck transmission.

### ■ Features

1. Keeping the quality of powder materials regardless of the weather conditions
2. Discharging powder material to high or distant places through a hose by air pressure
3. High durability and light weight tank made of high tensile steel
4. Simple construction for easy operation & maintenance

### Air Slide Type

### Air Agitation Type

Air Agitation tank is specially designed for transporting not only powder material such as cement and fly-ash, but also granular material such as quicklime and carbonated calcium. The material hardly remains in the tank due to separate discharge from 3 outlets.
